## Stats as of 2022-06-16

My open source work reports **4,536,253** downloads from JSDelivr in the last year

My NPM libraries have been downloaded **166,166** times in the last month

My reputation on stackoverflow stands at **917** points

My open source repositories collectively have **299** stars on Github

On my free time I maintain a mid-scale Open Source project called **Simply Hexagonal** that is part of [Open Collective](#), where I've orchestrated the efforts of **20+ collaboratos**, so far, and under which I've personally published multiple Typescript libraries which are currently **used by 400K+ production applications** (and counting)

My work has been written about in The New Stack:

<https://thenewstack.io/reduce-aws-processing-time-5-minutes-300-milliseconds/>

# Who am I?

I'm the swiss army knife of fullstack web development. With 15+ years of experience in a wide variety of industries including advertising, health, and [aerospace](#).

The 3 core strengths of my work are:

**Range:** I've worked and thrived in projects with a wide range of requirements. Some open to every technology under the sun (e.g. an app with both React and Angular with Scala and Parquet elements in the backend interconnected with a myriad of AWS services), while others restrictive to few but well thought-out choices (e.g. a SAAS application built entirely in React, Typescript, and MongoDB Data API).

**Communication:** I'm meticulous in making sure whoever I work with are on the same page in regards of requirements and have a clear understanding of expectations. I'm used to working with teams of 10+ collaborators. [I respond promptly to questions and concerns](#), lay out [clear and succinct roadmaps](#) to steer efforts in the right direction, and if needed will promptly jump on properly time-boxed calls to clear out concerns.

**Understanding of the Big Picture:** I'm able to see the core needs of a business and make sure that the right decisions are made to get the job done.

## You would want to hire me...

...to implement sane and well-structured processes, pick technologies that truly work well and cost-effectively together, organize and document development work for multi-disciplinary software development teams, and to bring out the best in our development team through robust CI/CD automations, [thorough documentation](#) and training.

# Technologies

These are the technologies I'm currently most proficient at (my stack):

## Base language

- [TypeScript](#)

## Front-end

- [React.js](#)
- [Vue.js](#)
- [Vite](#)
- [CSS4](#)
- [Sass](#)

## Back-end

- [Node.js](#)
- [Express](#)
- [Fastify](#)
- [GraphQL](#)
- [WebSockets](#)

## Documentation

- [Notion](#)
- [Storybook](#)
- [Swagger](#)

## Data

- [MongoDB](#)
- [Atlas](#)
- [Redis](#)
- [PostgreSQL](#)
- [AWS Athena](#)

## Devops

- [AWS Route53](#)
- [AWS CloudFront](#)
- [AWS API Gateway](#)
- [AWS Lambda](#)
- [AWS S3](#)
- [AWS EC2](#)
- [AWS ECS](#)
- [GitHub Actions](#)
- [GitHub Webhooks](#)

These are technologies I have had experience with in development of large-scale projects recently:

- [C++](#)
- [Scala](#)
- [CouchDB](#)
- [PouchDB](#)
- [React Native](#)
- [Google Computer Vision](#)

## Companies I've worked with

- Smash Media (2020-present)
- Softon Digital (2018-2020)
- Toptal (2015-2019)
- 18Techs (2017-2018)
- Gorilla Logic (2016-2017)
- AgilityFeat (2013-2015)
- Bosz Digital (2012-2013)
- PerHead (2010-2012)
- avVenta Worldwide (2009-2010)
- SITC S.A. (2003-2008)
